Opposes Move By Fulbright

To the Editor:

Why don't we print reports of all of our military weapons and espionage secrets in our largest papers to let all the world know where we stand on vital information necessary to maintain our stand against the creeping disease of world communism?

This seems to be the aim of Sen. Fulbright in his attempt to have an oversee of the CIA by his Foreign Relations Committee.

It is my opinion that we allow too much freedom of movement now. Communists run all over this country now. All they have to do is register, and most of them don't. Anti-war demonstrators are heard every day.

If we can't have one agency without every Tom, Dick and Harry senator's nose in it, we might as well let the world in on all of our business. It is a well-known fact that the more people in on a secret the faster it isn't. (Signed) John Brennan,

2513 Law, Kalamazoo.
